

# MONTPELLIER FRENCH TECH

## The innovation engine

Support for innovation is central to the development policy implemented by Montpellier Méditerranée Métropole. The success of our Business and Innovation Centre (BIC) is one testimonial: ranked by the UBI Global index as one of the top 10 best incubators worldwide, the BIC has assisted the creation of more than 600 startups over the past 30 years. These companies include some real stars. 13 of them were awarded the French Tech Pass in the past two years, placing the Montpellier area in second place nationwide, just after Paris. This vitality now spans multiple sectors: Montpellier obtained the creation of 7 thematic French Tech networks in 2016, the highest number attributed to any single French Tech metropolis. Entrepreneurs, we will be by your side when you act boldly!

### Chantal Marion

In charge of economic development, higher education and research, innovation, international affairs, and artisanship

## Succeeding together

When Montpellier joined the top French Tech metropolises in late 2014, it gave our innovation ecosystem some of the exposure it was missing. However, it did not come as a surprise to those who know the area. For the past 30 years, local public authorities have supported the creation of innovative companies and have been dedicated to promoting our main resource: brainpower. The strength of the Montpellier area research and training community, the vitality of startups within the territory, and the involvement of major groups in local dynamics have progressively enabled the emergence of a complete, dense, and high-performance innovation ecosystem. The effort we have undertaken together is firmly based on participation, with entrepreneurs at the heart of the action. Montpellier Métropole provides them with support and acts as a catalyst for initiatives. We will all win by joining our forces!

### Philippe Saurel

President of Montpellier Méditerranée Métropole  
Mayor of the City of Montpellier

# 7 PILLARS OF EXCELLENCE FOR REINFORCEMENT

## THE TERRITORY'S HEALTH OUTREACH

### THE LIFESTYLE METROPOLIS

One of the world's oldest medical schools, a strong university hospital, startups with an international outlook and the creation of Montpellier Health Capital project.

## AGROECOLOGY AND FOOD

### THE SUSTAINABLE METROPOLIS

An agronomic research cluster with global reach. Preserving the farming sector as a lever for economic development and catalyst for farmer-to-consumer cycles.

## DIGITAL

### THE SMART METROPOLIS

A French Tech-certified ecosystem, world leaders, a support mechanism recognized internationally for creating innovative companies.

## COMMERCE AND ARTISANSHIP

### THE LOCAL METROPOLIS

A revitalized downtown area, outlying commercial zones redesigned for a human-sized economy.

## ECONOMIC, TOURIST, AND INDUSTRY DEVELOPMENT

### THE DESIRABLE METROPOLIS

A Conference Center and Arena among the best in France, tourist policy reaching from the coastline to the back-country, a network of 20 business parks.

## CULTURE, HERITAGE, AND UNIVERSITY

### THE RADIANT METROPOLIS

A city punctuated by student life, a historical center rich with heritage treasures, two opera houses, contemporary works created by world-renowned architects.

## TRANSPORTATION AND MOBILITY

### THE INTERCONNECTED METROPOLIS

Four tramway lines, a direct TGV train line to Paris and Barcelona, two highways, an international airport.

## FRENCH TECH: DEFINITION

“FRENCH TECH” REFERS TO ALL THE PEOPLE WORKING FOR OR WITH FRENCH STARTUPS, IN FRANCE OR ABROAD. THE FRENCH TECH ECOSYSTEM IS PRIMARILY COMPRISED OF ENTREPRENEURS, ALONG WITH INVESTORS, ENGINEERS, DESIGNERS, DEVELOPERS, MAJOR GROUPS, ASSOCIATIONS, MEDIA, PUBLIC AUTHORITIES, RESEARCH INSTITUTES... ALL THE PLAYERS WHO ARE INVOLVED BOTH IN STARTUPS’ GROWTH AND THEIR INTERNATIONAL PROMOTION.

## 3 ACTION LEVERS

### UNITY

An attractiveness platform  
to promote French Tech internationally  
(budget: 15 M€).

**French Tech Hubs:**

French Tech communities certified abroad.

**French Tech Ticket:**

A welcome pack for foreign entrepreneurs.

### ACCELERATION

A Conference Center  
and Arena among the best  
in France, tourist policy  
reaching from the coastline  
to the back-country, a network  
of 20 business parks.

### PROMOTION

An investment fund with  
200 M€ for private startup  
accelerators, managed by Bpifrance.

**French Tech Endowment:**

Seed capital for launching startups,  
managed by Bpifrance.

**French Tech Pass:**

A premium offer for companies  
undergoing hyper-growth.

# Montpellier French Tech: Governance and orientation

---

## FRENCH TECH COUNCIL

The emphasis on French Tech Montpellier governance is based on a principle of equity and transparency. The council's 28 seats are shared by startups, schools, universities, major groups, investors, public authorities, and more. Each voice carries equal weight, whether from a startup or a national-level establishment. Based on a flexible structure, the French Tech Council meets once per quarter. Its mission is to drive actions and report ideas. The Council comprises three commissions, one for each French Tech Mission axis: Unity, Acceleration, and Promotion. Each commission is led by two mentors and includes one or more workgroups.

## THREE KEY AXES

### • ACCELERATION

In addition to the **Business & Innovation Center (BIC)**, the startup incubator managed by Montpellier Méditerranée Métropole, several other structures for accelerating private initiative recently emerged in Montpellier. Examples include the **Start2You** collaborative program, **XLR Capital** and **Sprint**, the first regional derivative of the **Numa** network, plus the **Dell for Entrepreneurs** program launched by Dell Montpellier. Simultaneously, the **In vivo** group launched an **agro-digital studio** in Montpellier destined to serve as an incubator, whereas Crédit Agricole du Languedoc will open an 1,800 sq. meter innovation space called **Le Village by CA** to accelerate post-incubation startups.

The **BigUp 4 Startup** event also emerged from within the Montpellier French Tech sphere, bringing together local companies and innovation directors from national groups. After two successful editions, the formula has inspired other French metropolises. Other original local initiatives include: **Xtrem Up**, an event that combines entrepreneurship and extreme sports; and **Open Cité**, a program led by the State and CDC to unite French Tech and city policy.

### • PROMOTION

French Tech helps promote international growth for startups in the Montpellier area, while highlighting local expertise. In 2016, entrepreneurs organized **Startup Lycée**, a competition for startups at a French high school in San Francisco. Missions abroad, such as **StartupXChange** in Austin, Texas, are organized regularly, and a partnership agreement was signed with **Montreal French Tech Hub** to make it easier for Montpellier startups to get settled in Montreal, as well as to welcome Canadian companies in Montpellier. Montpellier BIC, a French Tech Ticket partner, will welcome two international project leaders for one year starting in 2017.

### • UNITY

French Tech now has its own meeting place, the **Montpellier French Tech flagship building**, located in the former City of Montpellier town hall, just a few steps away from the central Place de la Comédie. Innovation stakeholders can go there to meet, exchange ideas and participate in events. The building also hosts companies in their high-growth phase.

# MEMBER OF 7 THEMATIC NETWORKS

The goal is to provide structure for sector ecosystems to favor startup growth and help tomorrow's mid-sized companies get off to a good start. Of France's 13 French Tech metropolises, Montpellier is the one that was awarded the highest number of thematic networks. This comes as recognition for the diversity of the territory's expertise.

## THE HEART OF WORLDWIDE AGRONOMIC RESEARCH

At Agropolis International, Montpellier hosts the largest scientific community in the world for farming, food, biodiversity, and the environment, with over 2,700 researchers and teachers. This fertile ground led to the emergence of vigorous young upstarts such as SMAG (providing web solutions for farming) and ITK (creating decision-making tools for viticulture). Since 2011, the presence of the GCRAI (Consultative Group on International Agricultural Research) has reinforced Montpellier's position as the worldwide capital for agronomic research. Montpellier is also home to the Qualiméditerranée competitiveness cluster, focusing on sustainable agro-technologies.

### #FoodTech

## THE FUTURE OF PAYMENT

Since the 2000s, Montpellier has positioned itself as an innovative territory in the field of Fintech (financial technology), which includes payment methods, credits-loans, merchant banking, insurance, and more. Numerous startups can be found in each of these sectors. This local energy leverages a university cluster and recognized research work, producing high-level training in finance, computer science, management, law, and marketing.

### #FinTech

## THE CONNECTED OBJECT REVOLUTION

A rich and dynamic ecosystem has bred several Internet of Things (IoT) champions in Montpellier, including AwoX, OCEASOFT, and Coronis. These entities are united by the Media Cloud Interactivity college, within the regional FrenchSouth.digital association. This sector leverages cutting-edge training centers, such as Epitech and Polytech, and two renowned laboratories: LIRMM (computer science, robotics, and microelectronics) and IES (system electronics).

### #IOT #Manufacturing

## HEALTH IN OUR GENES

Home to one of the western world's oldest medical schools still in activity, Montpellier is devoted to highlighting, on an international level, a sector that is rich with advantages such as a strong university hospital (CHU), high-level research centers, world-class groups including Sanofi, Bio-Rad, Horiba Medical, and Bausch+Lomb, innovative SMEs, and the Eurobiomed competitiveness cluster.

### #HealthTech

### BioTech - MedTech - E-health

## VIDEO GAMES AND 3D ANIMATION

After Paris, Montpellier is the French territory with the most video game companies, notably Ubisoft. The metropolis is also positioned in the animation and special effects sector, offering a range of internationally recognized training organizations, including Esma, and ArtFx, and Studio M.

### #EdTech #Entertainment

## MONTPELLIER ON THE PODIUM

Ranked by the magazine L'Equipe as the second-leading city in France for Sports, after Paris, Montpellier shines as an experimental area in the sports sector. The territory features a major university cluster and benefits from the presence of EuroMov, the European research center for human movement. The territory, which attracted Asics, the world's fourth-largest sporting goods manufacturer, is also home to many innovative startups and SMEs. Montpellier hosts the FISE event every year, the largest extreme sports festival in the world.

### #Sports

## DIGITAL SECURITY ISSUES

Montpellier dove into the digital security field in 2003, with the creation of CLUSIR-LR, the Languedoc-Roussillon Regional Club for Information Security. Momentum in this sector also leverages the presence of laboratories dedicated to cybersecurity, such as the SECNUM platform. In terms of education, Université de Montpellier was the first French university to offer a degree specializing in cybercriminality and information system security.
